Managing Critical Building Systems

FMPro™ is a cloud-based application by Digital Facilities Corporation (DFC) developed for the comprehensive Management of critical building systems and specialty equipment.

Flexible and Scalable

Manage individual or multiple asset areas for 1 to 1000 plus buildings. The VTPro™ module replaces random flat file reports and elevator service provider proposals with a comprehensive information platform to manage your Elevator equipment inventory. VTPro™ is ideal as a specified platform for Elevator assessment projects and Elevator & Escalator equipment management for institutional building owners.

VT Equipment Assessment Observations

Building owners can achieve significant cost savings by maintaining a designed format for Elevator electronic data files. Access can be provided to all stakeholders for on-demand information and reporting. Today, information access is as easy as opening a MAP view and drilling into the location of your building. Analytical charts provide visual information on the performance of your Elevator equipment to prioritize repairs and replacement.

Building Assessment History

Building managers can use FM-Pro™ to establish as-built system documentation using CSI master format™. Use time-saving copy and recall functions for building new systems. Use lists of components and Smart Text™ libraries for documenting observed defects and preparing recommendations. DFC also provides IT services for turnkey migration of legacy data from other sources.

Reporting

Users can choose from a vast selection of reporting templates for consultant-level Elevator condition reports with images, cover pages, and technical specification attachments. There is turn-key equipment inventory summaries with financial forecasts. Every page of the elevator installation details has preformatted reporting options.

A Modern-Adaptable Technology Tool

Elevator service providers managing multiple clients and organizations surveying their vertical transportation equipment can deploy FM-Pro™ to maintain accurate as built equipment condition and service information in industry formats with detailed Elevator condition reports and master budgets.

VTPro™ Value Added

- Standardize Data Collection
- Reduce annual inspection costs
- Collaborate with Service Providers
- Quickly Produce detailed budget & facility reports
- Use Analytical tools to improve Asset management

Key Specificaions

- Annual SaaS subscription
- WEB Accessible to thin clients
- Screen Views- Desktop & tablets
- Onboarding with data preferences
- Permission based – By User Role
- GIS links to key data
- Autofill Data Entry
- Smart Text Libraries
- Turn key Reporting

VTPro™ Management Areas

- Equipment Summary – Elevator- Escalator
- Condition Index Rating (VTCI)
- Equipment System Installation
- System Defects
- Service Calls
- Inspections
- Surveys
- Recommendations
- Warranties
- Work History

ABOUT US

For over Twenty years Digital Facilities Corporation (DFC) has provided mission-critical software for building managers and specialty asset area service providers.

Designed for Digital Records

A proven management platform for corporate facilities, REITs, school districts, universities, and institutions. Our long history with Institutional customers is a testament to the efficiency of this specialized approach to maintaining digital records in for critical building systems. DFC is a leader in designing technology applications for specialized asset areas.

Commercial Elevator Documentation and Management

The VTPro™ module enables the management of Elevator Equipment & People moving systems. VTPro™ is a specified solution platform for periodic condition assessment, capital planning, and maintenance services. If you are a professional service provider VTPro™ is a proven solution that can improve workflow, expand your service capabilities, and deliver professional reporting, to efficiently provide specialized client services.

Stakeholder Access

Our program modules replace one-off inspection reports and less detailed service provider formats with comprehensive Elevator information. FMPro™ is designed for comprehensive management of commercial roofing, Façade, Paving, and vertical transportation assets. Look for leading service providers that supply assessment and management services with FM-Pro™, they ensure a comprehensive data platform that supports industry-standard CSI master format® naming and numbering for assessment records.

Built for the Future

The nature of technology and application tools are changing, and the structure of electronic data has never been more important. Digital Facilities helps ensure your organization is positioned for new automation opportunities and ensures updating records is efficient and seamless.
