

FMPro™ Recommendations Report Filter Enhancements

ACTON, Mass (January 2023) Digital Facilities Corporation (DFC) has released a set of program updates for FMPro™ a specialized Building Envelope Management solution for comprehensive asset management of Roofing, Façade, Paving and Vertical transportation equipment.

FM-Pro™ is suited for building owners, asset area consultants and building service providers. This easy to deploy SaaS solution is ideal for maintaining annual observation reports, facility and building envelope assessments.

The latest release adds enhanced filter options to the recommendations report for all assets. The addition of status dates selections improve the viewing of facility and asset areas for a specific status with-in a data range. This new filter provides an additional tool to help users print reports that focus on priority asset areas minimizing their report generation time and improved clients reporting of FM-Pro asset information.

For a complete release bulletin and instructions on the new Recommendations Report Filter Enhancement options users can go to program features for the complete release bulletin.
