

Service-Manager Pro™ – Daily Job Reporting

(Update for Service Manager™ 3.0 users)

ACTON, Mass (Jun 2014) Digital Facilities Corporation (DFC) the industry's leading supplier of Roof Management Solutions, is offering an extensive daily job reporting tool for Service Manager –Pro™ 3.0 programs.

Service-Manager Pro™ (SMP) is designed for reporting, tracking and managing various activities on roof sections. Service Manager Pro provides a way of managing service and warranty work as well as large roofing projects via the web. The extensive customization and observation detail offered in SMP is not provided in standard roofing inspection apps and roofing service programs.

“The daily job reporting option allows professional service provides automation of this important documentation area for observing roof system installations. With a comprehensive daily job reports are available same day for supervisors to approve and post. Project data can be easily assembled for long projects over several months tracking lost weather days and installation detail. Electronic field forms designed for thin client devices and preformatted reporting options provide a time saving tool to meet the needs of building owners and professional service providers. –said Steven F. James, president of DFC.”

The new daily job reporting feature will be a standard tool offered in all SMP programs. For a detailed description of this program feature interested firms can contact the DFC sales office.
